

The Power Engineer's Resume Checklist

5 Rules Before You Apply

Use this checklist before submitting any application for a Power Engineer position.

RULE 1 — LEAD WITH YOUR CERTIFICATE CLASS

- Certificate class stated in the top section (e.g. "2nd Class Power Engineer")
- Exam progress noted if not yet certified (e.g. "Parts A–D complete, Part E scheduled")
- Certificate appears BEFORE your work history summary

RULE 2 — NAME YOUR SYSTEMS AND SCALE

- Named specific equipment (boiler type, turbine, compressors, heat exchangers)
- Stated plant size in BHP or MW where possible
- Listed relevant systems: fired heaters, pressure vessels, permit-to-work, BAS

RULE 3 — TAILOR TO THE SECTOR

- Oil & Gas: safety-critical framing, CSTS/OSSA/WHMIS, turnaround experience
- Institutional: multi-system range, Maximo/Archibus, after-hours coverage
- Utilities: high-pressure, turbine ops, emissions monitoring, NERC/IESO

RULE 4 — FRAME FOR THE ROLE TYPE

- Chief Engineer: show compliance ownership, budget accountability, personnel oversight
- Shift Engineer: show operational depth, shift handover discipline, independent decisions

RULE 5 — FINAL PRE-SEND CHECK

- Certificate class matches or exceeds the plant class requirement
- No jobs listed without context (facility type, pressure, scale)
- Sector-specific keywords match the posting
- Irrelevant certifications removed
- Titles used match terminology in the job posting
